Thakur Vijay Kumar Singh

+91 9000523252 tvijaykumarsingh06@gmail.com linkedin.com/vijayxkumar06 github.com/codeXAI06

Summary

Software Engineer with strong proficiency in Java, Python, SQL, Data Structures and Object-Oriented Programming. Experienced in building scalable full-stack applications using React.js, FastAPI, MySQL etc. Strong understanding of CS fundamentals with proven success in hackathons and collaborative software development.

Education

Course	Institute Name	University / Board	Year	Score	Course Type
B.Tech - AI & ML	Anurag University	Anurag University	2027	9.41 CGPA	Full-time
Intermediate	FIITJEE	SSC	2023	90.40%	Full-time
School	Sri Aurobindo International School	ICSE	2021	90.25%	Full-time

Experience

JPMorganChase Code for Good Hackathon

Frontend Developer *Hyderabad, India*

- Developed 3 interactive dashboards using React.js and REST APIs, improving NGO data visibility and tracking efficiency.
- Collaborated with a team of 5 developers following Agile methodologies, delivering a functional prototype within 24 hours.
- Selected among the top 100 teams, reaching the final round of judging.

Projects

ReliefLink | *React.js, FastAPI, SQLite* | GitHub

- Developed a real-time disaster coordination platform enabling communication between victims and volunteers.
- Built role-based dashboards capable of real-time updates using WebSockets.
- Integrated voice-to-text input and AI-based priority tagging, enhancing accessibility and reducing processing time.

AQI Air Pollution Forecasting | *React, Python, Machine Learning, Flask* | GitHub

- Developed an air quality forecasting system to predict AQI levels using historical pollutant and meteorological data.
- Evaluated multiple regression models using MAE, RMSE, and R^2, selecting Extra Trees with an R^2 score of 0.96 on the held-out test set.
- Engineered a React dashboard to present predictions and advice based on the predicted AQI value.

Technical Skills

Languages: Java, Python, SQL
Backend: FastAPI, Node.js, Flask
Frontend: React.js, HTML, CSS, JavaScript
Databases: MySQL, MongoDB, SQLite
Tools: Git, GitHub, Postman, Visual Studio Code
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Problem Solving

Achievements

- Runner-up at the JPMorganChase Code for Good Hackathon, competing against 100+ teams and 500+ participants.
- Ranked 2nd among 300+ students in Smart Interviews DSA Final Contest.
- Secured 49th rank among 22,000 students in AUCET, earning INR 3,00,000 scholarship.
- Top 5% of the batch with CGPA of 9.41 / 10.

Certifications

- Programming, Data Structures and Algorithms using Python - NPTEL.
- IBM Data Analysis using Python - IBM.
- Database Management System - NPTEL.
